

100 Days of Holidays
Owl Pumpkin

Start with a pumpkin with the seeds and inner flesh removed. If needed, use a photocopier to enlarge or reduce the pattern to fit the pumpkin.

Cut out around the pattern and attach it to the pumpkin with tape or straight pins. Using a thin marker, trace around the pattern. To transfer the detail of the owl's eyes and beak, use a pin to make closely-spaced pin pricks along the line, through the paper. Using a clay loop tool (about \$5 at art supply stores), scrape along the lines to carve the design.

To make small circles for the eyes, push a plunger-style apple corer through the pumpkin.
