STAR ORNAMENT
Cut, fold, and tape your way to a 3-D star.

What you need
- Star pattern (see next page)
- White paper
- Scissors
- Pencil
- Patterned scrapbooking paper
- Bone folder (optional)
- Fast-drying clear crafts glue
- Pearl cotton thread or ribbon for hanger
- Solid-color cardstock
- Rubber stamp with holiday message
- Ink pad

1. Print the star pattern onto white paper; cut out on the outside line. Trace the pattern onto the patterned paper (photo A); cut out.
2. Cut slits in the patterned paper, as indicated on the pattern. Fold the patterned paper, taking “A” lines inward and “B” lines upward, as indicated on the pattern. If desired, use a bone folder to make crisp folds. Fold the flaps created by the slits to the back and glue them together, finalizing the 3-D star.
3. Glue the thread or ribbon to the back of one of the star tips, forming a loop for hanging. Trace around the star onto cardstock; cut out. Glue the cardstock cutout to the back of the 3-D star; let dry.
4. For the banner, stamp a holiday message on a 6×½-inch strip of paper (photo B). Fold the strip back and forward to form a pleat on each side of the message. Put a dot of glue between the folds to secure the pleats. Use the scissors to notch each end of the banner. Glue the banner to the front of the 3-D star.
A: Fold in
B: Fold up
